Infrastruttura finanziaria nativa quantistica di nuova generazione (in attesa di brevetto)

Si tratta di un'infrastruttura finanziaria cloud Quantum Native in attesa di brevetto che consente l'acquisizione di un livello decisionale di nuova generazione per il credito e le assicurazioni.

Permette alle banche, alle assicurazioni e alle piattaforme ricche di dati come le telecomunicazioni di convertire i dati dei clienti esistenti in risultati di credito e di protezione spiegabili e pronti per le autorità di regolamentazione, aprendo l'accesso a milioni di persone attualmente escluse o a file sottili, senza aggiungere esposizione al bilancio.

Posizionata come pura infrastruttura, la piattaforma crea una porta d'accesso difendibile ai nuovi mercati finanziari piuttosto che un prodotto fintech per i consumatori.

Proposizione di valore principale

Converte i dati alternativi e consensuali (ad esempio, dati telco, comportamentali e transazionali) in decisioni di convenienza e rischio spiegabili.

Espande la base clienti indirizzabile riducendo il rischio di insolvenza.

Completamente verificabile, deterministico e allineato ai requisiti normativi.

Progettato per ambienti operativi ad alto volume e bassa latenza

Compatibile con gli standard di Open Finance e con i moderni framework di sovranità dei dati
